Single Use Patient Positioning Products
To assist in reducing the spread of COVID-19 throughout healthcare facilities.

Hipac
We're here for life

To minimise the infection risk to clinicians and patients in theatre we have carefully developed the following disposable products that can be supplied individually or as a custom pack to suit your unique requirements.

All products are manufactured in Australia and available for immediate delivery.

All foam products below include an Anti-Microbial Protection which is a natural, sustainable, bio-based microbial control solution that is derived from coconut oil. Its unique mechanical mode of action means it does not run down or deplete over time, is environmentally friendly, toxin free and safe for all.
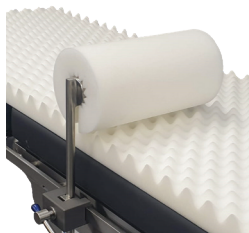

As we are the leading manufacturer for infection prevention patient positioning accessories in theatres, if you don't see what you are looking for here please feel free to contact us, we will likely be able to help and would be glad to hear from you.

All foam items below must be used on standard reusable table or positioning pads.
